VACATION EMERGENCY KIT.

With auto trips, vacation tours and camp life now the order of the day, suggestions for a simple emergency kit which may be carried in the coat pocket or traveling bag, may be appreciated. Here is a list of simple remedies which may be included to advantage:

- 1—One-half ounce tincture of iodine in a strong vial.
- 2—Two sterilized gauze compresses in sealed envelopes.
- 3—Two 2 inch gauze bandages.
- 4—Two-ounce carton of absorbent cotton.
- 5—Spool of zinc oxide adhesive plaster, 1-inch wide.
- 6—Half ounce flexible collodion in strong vial.
- 7—Collapsible tube of plain petrolatum or freshly made cold cream or zinc oxide or boric acid ointment.
- 8—1 oz. aromatic spirits of ammonia.
- 9—Two sealitiz powders, in waxed envelopes.
- 10—1 dozen 5-grain acetyl salicylic acid tablets.

The acetyl salicylic acid is one of the least harmful pain-killers for headache and similar conditions.

Prevention is generally acknowledged to be better than cure. Therefore do not cut corners or try to pass the car ahead just before you meet the wayfarer coming up the other side of the hill. But if you deem valor the better virtue, let the first person who comes along unwrap the kit, wind a bit of cotton on a match and give each of your wounds one swabbing with the iodine. If there is no bleeding, the cut or abrasion may be healed by painting on several coats of the collodion with another wisp of cotton wrapped on a matchstick. If there is a gaping cut or wound, the iodine having been swabbed on and in it, a few strips of adhesive plaster may be applied to draw the edges together, then a gauze compress and either a bandage or adhesive plaster to hold the dressing in place. No finger nor other unsterilised object should touch a wound.

LOCAL NEWS.

Hy Treit has returned from a ball-playing tournament with the McNaught, Saskatchewan team. The team had very good luck, winning 33 games out of 36 played.

Mr Brooks returned Saturday from a motor trip to Edson.

Mr and Mrs F Yeager have returned to their home in Nbraska, after a fortnight's visit at Glory Hills with Mr and Mrs A Wolfe.

Mrs Ferriell and daughter Eileen, returned to their home in Edmonton on Saturday, after visiting with the former's sister, Mrs C Witherspoon.

Mr T Hadley and daughter from Stral, were in Stony on Saturday.

A rumor in business circles is to the effect that Stony will shortly be visited by a lawyer from a town in Michigan.

The Misses Florence and Daisy Clark and Messrs Wm. and Thomas Clark, from Fort Vermilion, were visitors on Monday with Mr Jas. Smith.

Manley Donaldson was successful in securing first-class honors in the Junior Piano class at the recent Toronto Conservatory practical musical exams. Manley was a student at Alberta College, Nonsuch.

There was a dance in Stony Saturday night, which was fairly well patronised.

Local thieves are getting bolder. Thursday night a large container filled with gasoline was swiped from the rear premises of a Main street business concern.

Will the party who "borrowed" the 16-foot ladder from the print-shop premises kindly return same, as we'll need it when we paint our roof.

Stony's football captain was disappointed last Friday on receiving an intimation from the secretary of the Hudson's Bay team that they would be unable to keep their engagement with the Stonys on Monday last, as they would be otherwise engaged.

While leaving town Thursday evening last in his new Chevrolet, Mr Otto Seehagel was run into at the corner of Second St. and Meridian road by a car driven by a gentleman from Edmonton, who was on his way to the Beach. Otto's car was rammed amidst ships on the port side, the scuppers stove in, and some damage done to the sliding hatch. The car of the alleged offender received a few souvenirs, also.

Tolerance

Some years ago that master craftsman among movie picture directors, D. W. Griffith, conceived and produced a great spectacular film play under the title "Intolerance." Like other Griffith productions it was not only a wonderful and entertaining picture, but it sought to teach a great lesson. It depicted in a convincing manner the wrongs inflicted upon humanity at different stages of the world's history as a result of the intolerant views held by those in power for the time being.

Unquestionably, with the growth of education and a more widespread enlightenment of people, there is a lessening of bigotry and a larger degree of tolerance in the world today than ever before in its history, and it is a matter of rejoicing to know this spirit is developing. Nevertheless, there is plenty of room for a still greater development of this spirit not only in international relations, but within the bounds of each individual nation.

With another general election pending in Canada it is perhaps timely to urge the necessity for the display of a more tolerant spirit and attitude in matters political. As individuals we may differ on points of constitutional law, but that is no reason why one person or group should denounce those who do not see eye to eye with them in disloyalty either to Canada or the Empire. East and West may hold opposite opinions on the subject of the tariff, and both be perfectly honest and sincere in their views, but such difference of opinion surely provides no reason why the West should denounce the East as desirous of bleeding the West white, or for the East to accuse the West as selfish and ready to ruin all Eastern industry. Unity of opinion on such a controversial question is impossible, but it is possible that there be, and there should be, a tolerant attitude and a respect for each other's views.

A spirit of tolerance should characterize the adherents of every religious denomination or sect, yet all too frequently the reverse is true and the narrowest bigotry and bitter intolerance is displayed. In this, however, it is pleasant to note that the old racial and religious antagonisms and intolerance which for so many years in our past history disrupted and disrupted Canada have largely passed away. Today in our own country, as well as elsewhere, danger seems to lie in the words warfare between the Fundamentalists and the Modernists. By all means let there be full discussion and debate. Only so will the full truth be disclosed and established, but in it all let there be charity and tolerance.

It is well to remember that intolerance and bigotry are by no means confined to religion and politics. As Dr. Frank Glenn, head of the University of Wisconsin, and former editor of The Century Magazine, recently pointed out, there are bigots of patriotism, bigots of education, bigots of science, bigots of business, bigots of journalism, bigots of medicine, bigots of theology, bigots of reform. Each and every one of them is dangerous, and every one of them doing real damage to the cause of truth.

There is a very real need still apparent for a constant preaching of the gospel of tolerance; a very real need for combatting the still all too prevalent tendency on the part of many people to adopt an intolerant attitude towards all people and all questions with whom or which they are not in agreement. This "I alone am right, and you are wrong and must therefore be suppressed" attitude is the cause of more heart-burnings and community quarrels than almost any one other thing in our present-day civilization.

Intolerance, neither else, has split many a village and small town into factions not only to the detriment of each and every individual, but to such an extent that all community spirit and enterprise has been killed. And, after all, it is the most futile and nonsensical of human weaknesses. On the other hand, respect for other people's opinions, the encouragement of a spirit of chivalry, makes for peace, happiness and contentment in the home, for helpful co-operation in community life and effort, and for strength and unity in the nation. Intolerance aims at the suppression of truth, but truth cannot be suppressed. It is mighty and will prevail, and all that intolerance in thought and action can accomplish is to create ill-will and discord and thus retard the onward march of progress and achievement.

Anyway, the man who has no faith in himself is able to realize his own weakness.

Opportunity is an angel in disguise that some people suspect of being a gold-brick peddler.

The early fly that falls into the boarding-house milk picher is reasonably sure to find a watery grave.

"I miss my Swiss" sighed the 340 pound lady, whose diet included the exclusion of all forms of cheese.

Wonder Canyon Of Rockies

Trapper and Explorer Finds Gorge That Rivals the Colorado Canyon. A deep mountain canyon, carved at most perpendicularly through a high rocky ridge, a canyon so deep that it is said to rival the world-famous Colorado canyon, has been discovered by Albert Mercer, trapper and explorer, who has returned from a long journey through the little-known wilderness of the Copper River country in British Columbia.

This spring Mercer attempted to penetrate the country of the south fork of the Copper River, a country that has aroused his curiosity. Even though he did not reach his objective, he discovered the canyon and he believes that this find amply rewarded him.

The canyon is from 12 to 15 miles long and from three to four thousand feet deep. It is a paradise for mountain goat, Mercer claims. The canyon, he says, is so rough that wolves and other enemies of the goat cannot penetrate its fastnesses. He saw goats skipping about on points of rocks where a slip would have meant a straight drop of thousands of feet.

The south fork of the Copper River is described as a great grizzly bear country and would be a favored hunting spot if more accessible.

Drives Out Rheumatism Subdues Lumbago

Brings Ease and Comfort to the Sufferer at Once

NERVILINE

A King Over Pain

Those who seek permanent relief from the grinding pain of Rheumatism and Lumbago should read the letter of F. E. Normand, from Georgetown, who writes:

"I was fairly crippled with aching joints and Rheumatism. Nerville must have been what I needed, because it cleared up my trouble quickly."

Just A Boy

"Tom, would it be right to say you ain't been to the doctor this month?"

"No, ma'am; I go twice a week."

WOMEN OF MIDDLE AGE

Need Rich, Red Blood to Maintain Good Health.

After passing the age of forty every woman has reason to grow anxious about her health. This time of trial, with its attacks of faintness and fits of depression, its often violent headaches and back pains is rightly dreaded by women, but if reasonable steps are taken to safeguard the health, no serious ill-effects will arise. At this turning point in life Dr. Williams' Pink Pills have given a helping hand to thousands of suffering women who were fighting a hopeless battle against poor health and waning strength.

The very best help for any woman of middle age is the health help given by Dr. Williams' Pink Pills. These pills reinforce the blood by enriching and purifying it. In doing this they nourish the starved and over-taxed nerves and give new strength and vitality to the whole system. By this natural process Dr. Williams' Pink Pills completely dispel all pains and weakness, and a better, happier condition of health and spirits arises. Every woman of middle age should take advantage now of the wonderful health-help of Dr. Williams' Pink Pills. They are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Snapshots Of Moose

Shooting moose with a kodak is becoming a popular diversion. M. U. Bates, who runs a chain of sporting camps in the vicinity of Mississauga, Ontario, states that moose are so plentiful this year that he can guarantee photographs of moose almost daily within a few minutes paddle out of any of the camps.

Keep Minard's Liniment handy

Boosting Home Products

Great Britain imported more than 200,000,000 pounds of canned fruits and vegetables last year, so the National Food Canning Council is launching a campaign for boosting home products. British canners plan to triple their output this year.

Canada's Envious Position

Largest Trade Balance Per Capita Of Any Country in the World

Canada now has the largest favorable trade balance per capita of any country in the world. For the fiscal year 1924 Canada's favorable trade balance amounted to \$401,124,405, an increase over the previous year of \$116,705,259. At the end of March, 1925, Canada's favorable trade balance was almost entirely with the British empire, the amount for the empire being \$292,431,845 and for foreign countries only \$48,692,563. The unfavorable balance of trade with the United States amounting to \$125,970,454 was approximately compensated for by a favorable balance with other foreign countries.

Complete in Itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Will Purchase Elevators

To serve points in the province which are not at present served by the pool or the U.G.G. elevators, the wheat pool board has decided to build or buy at once elevators at thirty Alberta points. The volume of wheat handled is the basis upon which the selection of points has been made.

Faring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

Prolongs State of War

Occupied Area in Germany is a Thorn in the Flesh

By continued occupation of large areas of the Rhineland, the allies are prolonging the state of war, Chancellor Wilhelm Marx declares.

"So long as this state of war endures, the thorn is bound to remain in the flesh of the German people," he said. "It behooves the rest of the world, if it honestly desires peace, to release the still occupied zones."

The chancellor said he would consider it his task in September to carry on negotiations for Germany's entry to the League of Nations.

KEEP QUIET!

That's good advice if you have Diarrhoea. Then for quick relief take a dose or two of Chamberlain's Colic & Diarrhoea Remedy.

Grasshopper Plague in Russia

State of Siege Proclaimed in War on Insect Pest

To protect Russia from the spreading grasshopper plague, the district of Stavropol has proclaimed a state of siege, and has triumphant of local dictators, who are to be held responsible for waging a successful war on the insects which are endangering the crops. Cavalry and aeroplanes have been mobilized to spread carloads of poison, requisitioned from Moscow, while the entire peasant population has enlisted in army-like formation, under orders of self-elected officers, to rush in the harvest before grasshoppers destroy the produce.

Asthma Can be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

There is no hope for the man who refuses to let his friends lend him money.

Western Farmers Should Receive Higher Prices For Wheat On The Basis Of Protein Content

The protein content of Canadian wheat averages to much above that of wheat from other countries that there should be even more price preference for the Canadian farmer than is now obtained, but it is doubtful whether such recognition will come so long as chemical analysis is not given definite weight in the established standards for wheat grading. Neither United States nor Canadian standards give a recognition to this factor, that results in increased return to the farmer producing extra fine wheat.

Protein content of the wheat constitutes an index of the gluten content in the flour. Flour with high gluten content is more nutritious, absorbs more water, and will make more loaf of bread per barrel. Standards of bread making in Canada and the United States have reached a point where bakers pay close attention to the chemical content of their materials, with the result that they are willing to pay premiums for better flour. When this was first realized, millers were able to pick up odd lots of good quality wheat in a particular grade without paying more than the average price for the particular grade. Now, however, the situation is changed. A recent statement in "Wheat Studies" is to the effect that: "There are great variations in the protein content of wheat of a given grade. Consequently, because of the importance of this factor in millers' requirements, there is commonly a far greater range of prices for wheats of the same grade but of different protein content, than between average prices for adjacent grades."

To a great extent the farmer has failed to profit from this new criterion of wheat values because his wheat is sold almost entirely by standard grades. The dry land farmer who produces under conditions of high cost both because of summerfallowing and frequent loss of crops, is the farmer whose wheat would receive most recognition under this new standard. Recognition of protein content as a factor in grading wheat will do much to aid many of the farmers who are now marginal producers and will also raise the general level of the quality of the wheat produced. In the long run, standardization of a type which gives full credit for quality, benefits both the producer and consumer.

In line with this new criterion of wheat values, the importance of emphasizing protein content is another suggestive pointing out the advantages of a policy of keeping low grade wheats off the market and using these grades for feed purposes. Not only do low grades have a disproportionate "bear" effect upon the market, but they also tend to injure the reputation of the region from which they are derived. Strict maintenance of present standards has gone far to reward quality production, but because of the high quality of our wheat, further refinement of standards in terms of protein content will be particularly advantageous to Canada.

The province of Saskatchewan is particularly interested in this phase of the development of wheat production and marketing. It is a fact by the way, not sufficiently advertised—that Saskatchewan wheat has the highest protein content of any wheat produced in Canada, and the milling interests of the Dominion have a new shorting in the particular districts in this province where the high protein wheat is grown. South of the main line of the Canadian Pacific Railway and west of the Soo Line, produces the largest quantities of this extra high-grade milling wheat. The importance of this to our farmers is not yet realized, by concentrating on quality wheat production and establishing a Saskatchewan inspection system, and placing our wheat on the world's market as Saskatchewan wheat instead of the generalization of the northern numbers. It is possible that immense benefit may accrue to our grain growers, particularly when the Hudson's Bay route is opened up, ensuring our wheat reaching the markets of the world pure and undiluted by low-grade mixtures. It appears that it would be a great mistake for Saskatchewan to regard the present inspection system as final. Under it our wheat producers are suffering a loss to the tune of the Canadian grain crop as a whole.

—Moose Jaw Times.

The Feeding Of Chickens

Feed Containing Cod Liver Oil Found

Most satisfactory results are reported at Lennoxville, Que. Dominion experimental station from feeding chicks with a commercial starting feed containing a percentage of cod liver oil. The feed is supposed to be fed dry in open troughs or feeders as an exclusive starting feed for the first two weeks of a chick's life. The superintendent of the station (Mr. J. A. McClary) in his annual report, stated that last year almost all the chicks were started on this starter meal and that the results were outstanding in the health of the chicks, there not being a case of leg weakness or rickets and a low loss of chicks. Fresh water was always available and four quills were gradually introduced after the fourth or fifth day, about the eighth or tenth day alternate feeds of a root scratch feed was scattered in a litter, which practice was continued until the chicks were around six weeks old, when they were gradually accustomed to coarser grains, self-feeding hoppers being used in preference to hand feeding. Excellent results were obtained from having a home-mixed ration of equal parts of wheat and cracked corn in one compartment or the hopper and a dry mash of bran, middlings, cornmeal and a percentage of beef meal in another compartment. Mr. McClary conclusively gives this counsel regarding the rearing of chicks: Don't feed until at least 48 hours of age; have sufficient brooder heat to prevent crowding; feed every three hours a little at a time; musty or mouldy feed or litter must not be used; supply plenty of fresh water in clean fountains; make all changes in feeding gradually.

Cattle Exports Decline

Cattle exports to the United Kingdom continue to decline heavily in comparison with last year. During the week ended July 15, only 912 head were exported, a reduction in comparison with the corresponding week of 1925 of several hundred head. The total shipments for 1926 up to date are 49,496 head, and for the corresponding period of 1925 47,325 head. At one time the exports of cattle for this year were greater than for 1925 by 10,000 head. Now the increase has dwindled down to less than 2,000 head.

To Dominate Clover Seed Market

British Columbia To Undertake Extensive Cultivation Of Clover

British Columbia sees vast possibilities in dominating the Canadian clover seed market as a result of the reclamation project in and around Sumas Lake. This body of water was recently drained by provincial authorities, leaving a valuable tract of land, which will be opened up by a system of roads and offered for sale. In the meantime the government has experimented to growing clover seed, probably of the velvet variety, though a recent report in the "Victoria Times" does not specify the particular kind.

A field of 500 acres will be harvested this fall, the yield, it is expected, running around eight bushels per acre. Next season 5,000 acres of government land will be ready for harvest. The provincial minister of agriculture, Hon. E. D. Harrow, confidently expects to make a profit of \$100 per acre, and to have enough clover seed next fall to supply the whole domestic market without importing.

Registered Seed

Order Placed in Saskatchewan For About Fifteen Carloads

An inquiry for a quotation of 500 tons of registered Saskatchewan Marquis wheat has been received from a British firm by the Saskatchewan Registered Seed Association. This quantity represents 18,000 bushels, or about 35 carloads, and if filled will be the biggest consignment yet sent from the province. Substantial orders for registered seed wheat and other grains have been filled by the association for Argentina, United States and Canadian buyers in the last twelve months.

Immigration To Canada

Heavy Increase Is Shown In First Four Months of Present Year

A compilation of immigration to Canada for the first four months of the calendar year shows an increase of 81 per cent. over the first four months in 1925. The actual figures are 29,412 in 1926 and 21,776 in 1925. There have been increases in every month of the year ranging from 16 per cent. in January to 135 per cent. in March. For the first four months in question British immigration increased from 9,219 to 13,235; from the United States from 4,778 to 5,797; and from other countries from 4,879 to 19,722.

A Helping Hand

Ira Parent: "I'll teach you to make love to my daughter, sir." Young Man: "I wish you would, old boy, I'm not making much headway."

Landing Fields In Mid-Ocean Are Proposed By Engineer For Trans-Atlantic Air Line

Market For Cereals

Czecho-Slovakian Trade Pact Would Be Aid To Canada

Should a trade agreement be reached with the Czecho-Slovakian Government, Canada would receive the benefit of a reduction amounting to almost 50 per cent. in her exports of cereals and wheat flour to that country, according to F. V. Kveton, consul-general of the Czecho-Slovakia Republic in Montreal.

The new tariff law passed by the Prague Government imposing duty of \$1.68 on wheat, \$1.44 on oats and \$4.20 on wheat flour per 100 kilos had been suspended until August 13. After that date the consul hoped that Canada would take advantage of the "most favored nation treatment" extended by Czecho-Slovakia. Under such a treaty the duties would be lowered.

No Poison On Apples

Canadian Apples Not Affected By Spraying Methods

Following cable reports from England of arsenical poisoning from eating imported apples, Dr. Frank T. Shutt, D.Sc., Dominion chemist, produced for analysis 43 samples of apple, which he had examined and found to be free from arsenic and other poisons. The chief apple exporting districts of Canada in Nova Scotia, Quebec, Ontario and British Columbia.

Examination showed that approximately one-half the samples were entirely free from arsenic and the greatest amount found was slightly in excess of one-two-hundredths grain per pound.

At this rate it would require one dozen apples of average size to supply the minimum medical dose, one four dozen apples to supply the maximum dose.

Backward In That Respect

A pal in China sends me an amusing yarn about Lord Willingdon, Lord Byng's successor as Governor-General of Canada. His lordship, who has democratic leanings, was asked quite seriously by an eminent Chinese diplomat why the English Government didn't settle its labor disputes with machine guns. "We are a very backward race in that respect," answered Lord Willingdon, "but then in comparison with you we are still a young race, so please don't judge us too harshly."—London Mail.

Green Cabbage Worms

Poison Spray May Be Used As A Remedy

During the late summer and autumn green cabbage worms, which are the caterpillars of the white cabbage butterfly, destroy large numbers of cabbages by ridding the leaves and heads of the plants. The butterfly is very common in gardens where there can be seen depositing their eggs on the leaves of cauliflowers and turnips in addition to cabbages. Poison spray may be used as a remedy until the heads are half formed. A good non-poisonous remedy is fresh pyrethrum insect powder. One part of the powder should be thoroughly mixed with four parts of cheap flour and kept in a tight vessel for twenty-four hours before using. The mixture may be applied from a duster, sold by some men, or from a cloth chaff bag tied on the end of a short stick, the operator holding the bag over the plants and tapping the stick with a cane held in the other hand as he walks along the rows.

The Keeping Of Eggs

"Quarantine" Process Eggs Found To Have A Better Flavor

A series of experiments conducted over two years has brought out several points according to the report for 1924 of the Dominion poultry husbandman, relative to the keeping of eggs, among which are: That eggs treated by the "Quarantine" process grade much better when taken out of storage and have a better flavor than those not so treated; that eggs should be stored with the small end down; that freshness has an important bearing upon their keeping qualities; that clean eggs keep better than either dirty or washed eggs, and that cleanliness of nest and floor is a point that should be observed. The experiments, excepting that referring to the "Quarantine" process, were repeated at Charlottetown, Brandon and Agassiz farms and stations.

Harriet (at telephone): "Oh, Charles, do come home. I've missed the plugs in some way. The radio is all covered with frost and the electric fan box is singing 'Moonlight and Roses'."

Calgary Stampede a Big Success

Upper—Ready to contest for the honors of their title. Lower—Juggling the bucking contest.

The Calgary Stampede was unique in Canada, in that it was not professional. The actual cowboys, actual chuck-wagons and work horses from the ranches in the district were the performers. In other words, this stampede is "the real thing" in a ranching territory, where every kind of thrilling sport known in the west is participated in by genuine westerners. It is described

as a gigantic celebration, staged on its own grounds, by a western community. There are very few such events in America or even in the world.

SAYS NOTHING SUPPRESSED IN DUNCAN REPORT

Montreal.—The Montreal Star carries the following Ottawa special: "In view of the discussion of the political platform and in the newspapers as to the Duncan report on investigations into the customs department and the conflicting allegations that are made, Inspector Walter Duncan, special investigating officer, was asked for a clarifying statement as to 'whether anything was suppressed, and if so, what it was.'"

"I was detailed," he said, "to make an investigation into the administration of the customs service in Montreal and that district, and I did so. I sent papers and documents in the office of J. E. A. Blais, chief preventive officer of the district, and I summoned and examined on oath officials who, I thought, were in position to throw light on the question. The evidence was taken and transcribed. I submitted first an interim report and afterwards a fuller report. Both of these reports were produced before the committee of the house that investigated the customs department and were read into the record of the inquiry. Nothing that was suppressed or deleted, by the evidence, comprising 319 pages, upon which the reports were based, was not read into the record, although it was tabled in the house. The exhibits were also tabled."

"What I did not produce before the committee and what was not published was a memorandum book to a certain woman. The notes in the book were in shorthand. I had them extorted."

Modified Services

Will Not Be Complete Suspension of Religious Services in Mexico
Mexico City.—The Archbishop issued a statement declaring that the withdrawal of the priests from the churches on August 1, as announced in the recent pastoral letter, does not mean complete suspension of religious services.

The services suspended will be holy communion, confirmation, confession, consecration and some sacraments which require the intervention of priests. Services which can be continued without the intervention of priests are modified marriages, marriages and baptisms.

It is also announced by the archbishop that during the cessation of the priests' services a sincere act of repentance on the part of a Mexican Catholic will be considered equivalent to the confession necessary for death and marriage sacraments.

Wives Must Remain At Home

Australia Expects British Parliamentarians to Make Trip Alone

London.—Australia is set against wives. When the Australian cricket team sailed for Great Britain, the Australian cricket board of control put a ban on wives accompanying the members of the team.

And now the Australian branch of the Empire Parliamentary Association has advised British parliamentarians who are soon to visit Australia that they are not expected to be accompanied by their wives.

J. H. Thomas and several of the other members of parliament have refused to make the trip because their wives are barred.

Federal Nominations

Winnipeg.—A. A. Heaps, who, along with W. B. Woodworth, represented Labor in the last house, was nominated to contest North Winnipeg constituency in the forthcoming federal election, at a meeting of the Independent-Labor party here.

Brandon, Man.—David W. Beaubier, Conservative in opposition Robert F. Perkins, Progressive.

Nanaimo, B.C.—C. H. O'Halloran, Liberal.

Buy Biscuit Plant

London, Ont.—The Canadian Biscuit Company announces the outright purchase of the D. S. Perin Company, Limited, manufacturers of biscuits and confectionery.

W. N. U. 1640

Loss In Florida Storms

Property Damage Is Estimated To Run Into Millions

Jacksonville, Fla.—Reports of damage where the storm had passed came in as crippled wire facilities were slowly restored. A message from Nassau via Miami stated that damage there at \$5,000,000.

A message received by the Munson Line in New York from the steamer Munamur, at Nassau, said that place was wrecked by the hurricane. Miami's damage was principally to the Avocado pear crop. Palm Beach's playground suffered heaviest damage in the loss of more than a score of yachts and small craft which went down when a pier gave way.

Drying Beach experienced damage to light and power lines, disrupted telephone service, uprooted trees, washed out highways, wrecked beach concessions and damaged small pleasure craft. After a night without light, the power service was restored.

A rum running vessel was reported ashore several miles north of Orlando.

The storm took only two lives as it passed up the Florida coast, but it caused property damage estimated in the millions for Palm Beach. Loss was estimated at \$1,000,000, that of Stuart, Fla., at \$250,000 and Miami at \$100,000, in addition to damage to shipping, telegraph and telephone wires and crops at scores of places.

Asks Canada's Co-operation

British Government Asks Aid in "War" On Rum Runners

London.—Canada will be asked by the British Government to co-operate to the fullest extent in the fulfilment of the agreement between Great Britain and the United States to facilitate the suppression of rum-running. As a result of the visit of General Andrews, chief American prohibition officer, details of co-operation between British and American authorities in this connection have been arranged.

Canada is not directly affected by the main part of the agreement which is directed toward the Bahamas from which a vast flood of the prohibited fluid has been pouring into the Southern States. An effort will be made, however, to prevent the use of the British flag by rum-runners who are not on British registry, and it is believed that Canadian authorities will be able to help along the enforcement efforts in this direction.

Re-Draft Petroleum Laws

Revise Rules Governing Oil Leases In Alberta

Edmonton.—Revised rules and regulations in respect to oil and gas leases in all parts of the province have been prepared by the Alberta Government, but will not be put into force for the time being. The re-drafting of the petroleum laws in this regard was undertaken some months ago when the prospects for Alberta's entering into possession of her natural resources were bright. It was felt that to be highly desirable that a uniform procedure for leasing oil and gas rights in all classes of lands be provided and new regulations were drafted accordingly.

Mine Trouble In Cape Breton

Glace Bay, N.S.—The trouble at the Collieries as a result of the United Mineworkers' members' refusal to work with members of the Ous' Union is spreading. In addition to No. 35, which has been tied up since Monday night, the Florence Colliery at Sidney Mines is closed down and the Princess is working with reduced force. It is feared that the struggle will become general.

Increased C.P.R. Earnings

Montreal.—The statement of earnings and expenses of the Canadian Pacific Railway for the month of June, 1926, shows an increase in net profits of \$1,242,852.89 over the corresponding month last year, and for the six months ended June 30, 1926, an increase of \$6,159,041 over the first six months of 1925.

Whittemore to Hang

Baltimore, Md.—Governor Albert C. Ritchie refused to commute to life imprisonment the death sentence of Richard Reese Whittemore, gang leader and slayer of a Maryland penitentiary guard. He will be hanged August 13.

GOVERNMENT TO DECLARE WAR ON BOOTLEGGERS

Toronto.—The Dominion Government has entered the "fight to a finish" which has been declared against bootleggers following the deaths of 35 persons in Western Ontario presumably as the result of the flooding of that area with poisonous alcohol. The co-operation of the Federal authorities was promised in a telegram received here from the deputy minister of customs.

Hon. W. H. Price, acting attorney-general for Ontario and leader in the war against the illicit whiskey traffic, declared a special officer of the Royal Canadian Mounted Police was being sent here to consult with provincial officers in an effort to aid in the discovery of the point of origin of the death-dealing fluid.

It is indicated that the assistance of the Dominion Government is also to be sought in an effort to prevent a recurrence of the unprecedented liquor tragedies. As a result of the investigations of the past few days, it was unofficially stated that the Ontario Government would ask that federal legislation be passed compelling the registration of unaturalized foreigners. It was intimated that the probe has shown the liquor traffic to be almost entirely in the hands of foreigners.

Philippines Import

Wheat Flour

Manila, P.I.—Consumption of wheat flour in the Philippines has increased in the last few years. Figures of the bureau of commerce and industry show that although rice is the chief staple the Filipinos are using bread as a supplementary food generally and in some cases as their principal article of diet.

Wheat, importations last year were 76,000 tons as compared with 45,000 tons in 1921. Four-fifths came from the United States.

New Industry For Alaska

Department of Agriculture Trying to Raise Sugar Beets

Anchorage, Alaska.—An experiment in raising sugarbeets will be made in Alaska.

The department of agriculture and the Alaska railroad will co-operate in the effort. The experiment will be made in the Matanuska and Tanana valleys north of here. Cost of production and quality of product will largely determine the future of the venture.

Royal Tomb Violated

Orleans, France.—There have violated the sepulchre of King Louis XI, at Clercy, carrying off precious golden and jewelled chalices, and reliquaries to the value of more than \$100,000.

More Highlanders for Canada

Scotland continues to pour of her best into the Dominion and specially the attraction seems to be the west. There is not a Canadian Pacific line that sails the Atlantic but brings its quota, and usually a pretty large quota, of brawling Scots. In a word, the very best class of settlers that the country can get—and the more we get of them the better for all of us.

Complaint Against New Settlement Act

Union Members In British House Say Act Is Failure

London.—Complaints that the present union settlement act is a failure, coupled with the suggestion that the sums unpaid each year for the assistance of immigration should be carried forward annually for the same purpose and not returned to the consolidation fund, which cannot further be drawn upon, were made in parliament by Unionist members from Lancashire and Cheshire. The complainants assert that the greater part of the £20,000,000 which has been provided by the settlement act during the last three years has not been spent and under the present regulations is now no longer available.

They also declare that the clause providing for Dominion contributions is acting as a check upon immigration because of the conditions imposed by the various Dominions. They suggest that a portion of the fund provided by the British Government should be utilized without reference to the Dominions' contribution overseas.

Gives Reason For Coal Strike

England Returned Too Soon to Gold Standard Says Beaverbrook

London.—Lord Beaverbrook said recently on the White Star liner Mauretania for Canada via New York. In a long article printed over his signature in The Daily Express on the eve of his departure he declared the failure of the recent negotiation for the purchase of the White Star line by the British shipping industry was due entirely to the British official policy of maintaining the gold standard. He intimated that the proposal to transfer £600,000 pounds from Britain to the U. S. for the purchase of this line was opposed by the British financial authorities on the ground that it would depress the value of the pound in New York and hamper the present exchange conditions. He also argued that the coal strike is a direct result of the too early return of the gold standard as this raised the cost of selling coal in foreign countries so that the cost of production at home had to be lowered in order to keep up the possibility of competition in the world market.

Belgium Will Pay Debts

Premier Declares No Request For Cancellation Will Be Made

Brussels.—Belgium is determined to meet all its financial obligations, despite the serious situation confronting its treasury, Premier Jaspas has declared. Questioned as to the possibility of a request for cancellation of its debt to the United States, he said: "Belgium has signed the Washington agreement and does not think of not keeping her engagements, however heavy may be the charges to pay the exterior debt, which necessitates payments in dollars which very seriously weigh on Belgium's treasury."

MANITOBA POOL FAVORS BUYING OF ELEVATORS

Brandon, Man.—Endorsement of the action of the board of directors in declining the offer of the United Grain Growers, Limited, to form a joint holding company to operate United Grain Growers' and Pool elevators and a resolution in favor of buying or leasing United Grain Growers elevators in Manitoba were features of the annual meeting of delegates to the Manitoba Wheat Pool here.

These resolutions, passed with only four dissentients followed upon a full discussion of the action of the report of the board of directors dealing with elevator policy.

The failure of United Grain Growers, Limited, and the Alberta Pool, to agree with regard to the management of a joint elevator-holding company was brought before the meeting and a telegram was read from R. O. German, secretary of the Alberta Pool, stating that following the breakdown of negotiations between the Alberta Pool and the United Grain Growers, the Pool had notified United Grain Growers of their readiness to purchase their elevators in Alberta and had appointed a committee to carry on negotiations for this purpose.

Pool grain was handled at a cost of 1.25 cents per bushel this year, according to the interim financial statement presented by the pool shareholders' auditors, Miller, McDonald and Company.

Has Allayed Fears Of British Authorities

Cannot Contract Foot and Mouth Disease From Meat Says Doctor

The Hague, Holland.—There is no danger of foot and mouth disease being contracted through the use of the meat of animals affected by the disease and killed during the quarantine period, according to Dr. Laurens, director of the Institute of State.

As a result of Dr. Laurens' experiments with regard to infections from animals affected by foot and mouth disease.

Tour Broke Up Team

Seven Austrian Football Players Are Remaining in America

Vienna.—The American tour of the Austrian Hakoah football team, the best players in the country has had a sequel in the disintegration of the team.

"Seven players who cannot be replaced, have refused to renew their contracts because, they have got disgusted with America," the club manager announced sadly. "That is the price we have to pay for their fine sporting feats."

French Kill Syrian Tribesmen

Many Prisoners Taken in Fighting Around Ghouta

Beirut, Syria.—Several hundred dissident tribesmen have been killed by the French and more than 300 prisoners taken in fighting around the oasis of Ghouta, according to a general staff communiqué.

The French statement charges that two tribesmen who were forced by camels to lead in the midst of their enemies were wounded and then fastened to their plane and buried.

Durkin Gets 25 Years

Chicago.—Martin J. Durkin, shack gunman, who killed Edwin Shanahan, a federal agent, was sentenced to thirty-five years in Joliet penitentiary after a motion for a new trial had been overruled. A jury had freed the punishment.

Eskimo Woman Charged With Murder

St. John's, Nfld.—Julian Tuila, an Eskimo woman, of Hopetown, on the Labrador coast, was brought here to stand trial on a charge of murdering her husband. He was killed with a hunting knife.

New \$5,000,000 Cold Storage Plant

Negotiations have been completed for the erection and work will be commenced upon a terminal warehouse and cold storage plant to cost in the neighborhood of \$5 million dollars and to be located just below the Pince Viger Station on Craig street, Montreal, according to information given out at Canadian Pacific Railway headquarters. The plant will be built by the Montreal Rail and Harbor Terminals, Limited. It will have a space area of 600,000 square feet, of which one-third will be devoted to refrigeration purposes, the balance to be used as dry storage for packages freight and other merchandise. It will be of the most modern construction of concrete throughout.

The building, which will be ten stories in height, will, it is stated, be completed in ten months' time and the roof will be on before frosts commence. The Montreal plant will be built on property purchased from the Canadian Pacific Railway and will serve the trucks and shipping facilities of that company. It will be in no sense competitive with any other concern of a similar nature in Montreal, but will develop and expand its own business, handling in particular butter, cheese, eggs and other dairy produce cargoes, so far as its cold storage end is concerned, while its dry storage space will be amply taken up with package freight and other merchandise.

The Wool Industry in South Africa

Letter from E. S. Burdett, Bloemfontein, O.F.S. Africa.

Underwood & Underwood
Wooling woolens with primitive combs in Africa.
H. H. C. Currier.

The Union of South Africa is rightly classed among the great wool producing countries of the world. Climatic conditions there are admirably adapted to breeding and raising of the Merino type of sheep with a strong, staple wool.

A large part of this country is suitable only for the raising of sheep, and the government is making progressive and intelligent efforts to improve both the sheep and the manner of preparing the wool for market.

Jackals being a strong menace in South Africa, long-time government loans are extended to sheep owners for the erection of jackal-proof fencing. Government sheep experts are maintained permanently in allotted districts so that their services and advice may be assured at a nominal fee.

The mutton sheep of South Africa is the fat-tailed, black-headed Cape—a non-wooled sheep. As no cross-breeding for mutton lambs is done, the wools are purely Merino in character.

Progress in this South African industry is particularly noticeable in the harvesting. Despite the fact that Kaffir labor can be secured at the equivalent of \$3.50 per month, there is a trend towards the modern shearing machine as against the age-old hand blades, which, even on this continent, have not been discarded by many otherwise entirely progressive wool raisers.

A study of this fact, however, readily reveals the reason for it. While there is a first cost for the machine, the unskilled black adapts himself to its use much more readily than to the hand blades, and soon does a remarkably smooth job of shearing with the machine.

Once adapted to the use of the machine, its economic value is demonstrated in the materially greater number of sheep shorn daily, the better market value of the wool, the

fewer maimed sheep, and not least important, the additional 5% to 12% more wool obtained with the machine over and above the amount of wool secured with the hand blades. As a consequence, the machine resolves itself into a small investment with certain and big returns.

Steadily, the science of wool-marketing in South Africa is fast approaching the scientific efficiency of the Australian marketing plan, which is, without doubt, the most practical and efficient in existence to-day.

Considering that the four provinces, Natal, Transvaal, Orange Free State and Cape Province, which comprise the Union of South Africa, have over a million square miles less of territory than the populated Provinces of Canada, it is surprising to note that they contain over ten times as many sheep as the whole of Canada. The Union of South Africa ranks about fourth among the countries of the world in sheep population. These points alone put that country in line as a strong contender for future leadership in the wool industry.

It is interesting to note, however, that the great bulk of their progressiveness is due to quickness in observing the advantages of modern implements and machinery and up-to-date methods and discarding the old ideas that are not nearly so profitable.

In view of the wonderful progress the wool industry has made in South Africa in comparatively short time, that industry is surely destined to take a large and important place in the economic progress of the far distant Union of South Africa.

Here and There

A total of 800,000 trout fry from the Banff hatchery have been placed in Sylvan Lake and 800,000 in Buffalo Lake, during the past week. A further consignment is to be placed in the tributary waters of the Red Deer River.

Export of pitchard oil to Europe will commence in bulk in September. Producers have contracted to ship 600 tons on each ship of the Royal Mail Steam Packet Co., for several months. The market is in Rotterdam. The company will have about two ships per month. Pitchard oil is used in preparing foods and medicines.

A further step forward in the effort to restore to Montreal its leading position in the live stock industry was taken recently when members of the Eastern Cattle Market Exchange met to reorganize their operations on the basis of new changes made calculated to improve Montreal's standing in the industry.

Duke Dmitri, of Leuchtenberg, Count de Beauharnois, lineal descendant of Charles Marquis de Beauharnois, who governed Canada in the name of the French King Louis XV. between 1765 and 1767, is visiting for the first time the country in which his ancestor made history. He is taking part in the Grand Pow-Pow of the Canadian Trail Riders which is being held in Plamignon Valley near Lake Louise, in the Canadian Rockies.

The English football team have finished their seven weeks' tour of the Dominion and they were greatly impressed with the generous hospitality tendered to them by the people in the cities they visited. Joe Smith captain of the team, said: "Canadian football will, in a few years, in all probability be on a par with the brand of soccer played by the major leagues in Great Britain." According to him the object of the tour has been fully accomplished.

Coming from all parts of Great Britain and Ireland, twenty-five thoroughbreds, were unloaded from the Canadian Pacific liner Metagama when it arrived in Montreal lately. They are for Mulan's breeding and training ranch near Winnipeg, and comprise one stallion, 16 mares and eight geldings. Nellie's Pot, 3-year-old, by Cygnus (Sire of winner of Scottish Derby last year) out of La Lie; and Denton, two-year-old, who comes of the same breeding as Coronado, winner of this year's English Derby, were among the horses arriving.

Captain Kilroy Harris, lecturer and radio talker in the United States on Australia and New Zealand, recently passed through Montreal on his way to the west, where he will take part in the Trail Rides in the Canadian Rockies. He is already possessor of a silver medal for having completed 100 miles of trail rides and hopes this year to earn the gold medal that bestifies to the completion of 500 miles riding trails in that district. Capt. Harris is gathering material from Canadian sources for his lectures and radio talks.

Reports from the Banff Springs Hotel and from agents along the line of the Canadian Pacific Railway from Banff to the Pacific Coast received at C.P.R. headquarters, state that the forest fire in the Kootenay Park region at their nearest point are eighty miles distant from the hotel, and that they are nowhere near any of the tracks of the railway. Guests at the hotel and travellers on the railroad have been in no way inconvenienced by the fires and these are now stated to be well within sight of control. Banff Springs Hotel is at the present time enjoying the busiest season in its history.

**AVOIDED
AN OPERATION**

Mrs. Dayman Gives Lydia E. Pinkham's Vegetable Compound the Credit

I know the signs. She'll probably decide to take you under her skin. You will make an admirable role for her."

A curious turmoil shot through Joanna's blood. "Yvonne Corbin might take her, Joanna under the wing! The most glittering wing in the world according to her standard. She glanced shyly at the man who was dancing with her. He caught

"Quite probable, I assure you, insisted. "And the obligation to be on your side, you know, is not a small one." It was a money. "She's collected half at least two millioaire fortunes already. I'll be Brandon."

"Mr. Brandon? I don't see you mean."

"Yes, you've got me gossiping. Oh, well, we're all new friends. I play us one against the other, likely. So I'll start your imagination working. If there is one thing I'll world that our charming young ladies, that she hasn't found a young man to marry, I'll be sure to hear. And Brandon undoubtedly be having a try at you. Because other women would handle the lion differently. You'll mind you'll want to take her newest right."

"I'm not a little bit afraid," she spoke lightly, almost playfully but Joanna was certain he was fous. And she remembered her

CHAPTER XI

"'Clever, that.' Yvonne declared. 'It proves what I've always contended—that a man ought to have a style of his own. It's positively grotesque to listen to most men go sentimental.'"

"What weary hours you must spend!" Kenilworth exclaimed.

"I promise you complete relaxation if you will take a turn on the floor with me. Miss Manners, here, is dying to ask you what sort of a character, and to ask you who you're planning to marry next."

"A cockle! First," she demanded.

A walter, to whom Kenilworth had entrusted a pair of silver flasks, responded to his signal. Joanna had refused a previous offering and had not been present. This time Brand-

(To be continued)

It Testifies for Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

Brings Substantial Income

Missouri Woman Makes Good Living Selling Butterflies

Income from the sale of moths and butterflies helped Mrs. Edith B. DeCoster, of Buckfield, Missouri, to educate her three daughters and take a year's vacation in California.

It began with the finding of a caterpillar in the garden by her daughter, which gave her the idea. She has sold tens of thousands of moths, butterflies and cocoons to teachers and naturalists.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action be taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and soothe the little one, and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opium, alcohol, or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail for 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

But why dost thou judge
brother?—Rom. xiv. 10.

The glance that doth thy neighbor
doubt,
Turn thou, O man, within,
And see if it will not bring out
Some unsuspected sin.
To hide from shame thy branded brow
Make broad thy charity,
And judge no man except as thou,
Wouldst have him judge of thee.
—Alice Carey.

Such as everyone is inwardly, so he
judgeth outwardly.—Thomas A. Kemp-
is.

What man can judge his neighbor
right, says he whose love makes him
refuse to judge him?—George Mac-
Donald.

Seals Sink Boat

Power Launch Sinks When Fifteen Seals Climb Aboard.

Seals looking for a place to spend themselves are playing havoc with small boats off Santa Monica, Cal.

Attributed to the bay in unusually large numbers by good fishing, the seals have failed to find rocks upon which to sun and have taken to the small craft anchored at short distance of shore.

A 52-foot power launch sank this afternoon with fifteen of the animals, many of them weighing more than a human being, climbed aboard. Two other vessels were almost sunk before the seals were driven away.

Contemplates Commercial Career
Ex-King George of Greece May Enter
Trade
Ex-King George of Greece, who with his wife is now visiting London, is said to be contemplating a commercial career.
When he was forced to abdicate many years ago by the Greek revolutionaries he was promised an annuity which has not been forthcoming.
The ex-Queen is a daughter of the Queen of Rumania. The ex-King was educated in England.

Poultrymen!

**Can YOU answer
these 5 questions?**

How soon after hatching should chicks be fed?

When can you stop feed laying pullets to "go off their legs?"

What feed makes chicks mature rapidly?

Why should very little nut and bone feed be given breeding stock?

What feeds combine the vitamins that prevents chicks from having rickets?

The correct answers to these questions are worth many dollars to poultrymen. They are found only in "The Department of Agriculture, Ontario, has prepared a booklet, "Poultry Feeds and Feeding," which reveals in simple language the secrets of successful feeding. Tests the best and most economical diets for brooding, a high egg yield, rapid growth, etc. Saves you money in feeds, and brings you larger profits. Remember, it's not hard to write, and the Government need it absolutely FREE!

Stony Plain and District.

Miss Lottie McLeod, from Dole, is a visitor this week with Mrs. Maud McKibby.

Mr. H. G. Shaw, ex-councillor of Inga Municipal District now of Holden, was visiting this week with old friends at Bright Bank. Mr. Shaw has sold his farm, is taking back with him to Holden some of his fine herd of Holstein cattle, and sold the balance to a Holstein breeder at Viking.

Auctioneer, Zucht, held a very successful sale at Carvel Tuesday, when the stock and effects of Mr. A. Catherwood were put on the block.

The Mission Festival held last Sunday at St. Matthew's Church (Missouri Synod) was very successful, a large number being in attendance. A Mission Festival will be held next Sunday at Peace Church at Spruce Grove.

Several petitions are in circulation among the resident voters of Inga M.D. to be presented at the meeting of the councillors in Stony Plain on Friday, August 20. These petitions are in protest against the passing of the proposed Herd by-law which will come before Inga Councillors on that date. According to the reading of the Ordinance, votes may be recorded by voters resident in the M.D. as well as residents in the area affected.

All crowded to the Pitzler Barn, Friday night, where a just-right sized crowd of dancers gathered for the formal opening. They were rewarded by having the pleasure of tripping the light fantastic to music supplied by the McDonald's Five Orchestra, of which none better has been heard west of the 5th. The floor was good, and the place well lighted, cheerful and airy. A good lunch was served at midnight, to which all did ample justice; Pitzlers are to be congratulated on the great success the event proved to be.

Grade VIII examination results are the only ones of the Departmental examinations which will be published in the newspapers this year. These will appear about Aug. 10. The results of the other examinations will be sent direct to those who wrote along with the marks obtained in each subject.

Dr. Michael Clark, former member of parliament, pioneer of Central Alberta, and prominent in the councils of the Liberal party, died Thursday morning at the family residence, near Olathe. His death followed that of his wife, who passed away several weeks ago in a hospital in Calgary.

Announcement has been made that C. M. Hall, manager of the Alberta Pacific Grain Co., has been appointed general manager of the Alberta Wheat Pool elevators. Some 18 elevators have now been purchased by the pool and contracts have been made for the erection of elevators at six other points.

The scholarship offered by George Hoadley, Minister of Agriculture, to the member of the girls' clubs of the women's institutes of Alberta accomplishing the best work during the year, has been won by Miss Nava Daly of Mission. This scholarship provides three months free course at one of the agricultural schools in domestic science.

Spruce Grove Notes.

Miss Lewis, returned last week from a vacation spent at Buffalo Lake.

Contractor Dickie has been engaged to erect several buildings in this district.

The results of the Departmental exams shows the local boys who were attending high school in Edmonton came out pretty good. Donald Martin scored 100 per cent in chemistry, with an average of 75.5 per cent. Reginald Emelbeck obtained an average of 65.5, and Tom Johnson 63.5.

A rumor is current that the Brooks Grain Co. intends building at the Grove.

Mr. Martin made a business trip to Calgary this week.

St. Joseph's church was filled to overflowing Sunday morning on the occasion of the confirmation services. His Grace Archbishop O'Leary officiated, assisted by several priests. The following were among those confirmed—

Mary, Margaret and Katherine Gyles; Mary, Anna and Helen Wagner; Miss McLeod, Theresa & Lucile Guenet, Dorothy Wyld, Josephine Alt, Florence Woccosok, Carrie Sydeman.

Rudolf Wagner, John McLeod, Oscar & J. Guenet, Wm Wyld, — Benelien, C. Woccosok, Jos Sydeman, A. Klapper.

A Booster for Alberta.

The following letter was received last week from Mr. G. W. Gleason who is now at Cedar Rapids, Iowa. Mr. Gleason made a tour of Western Alberta last summer, getting information at first hand, on the conditions in this country. He returned to the States for the winter.

"I like Alberta much better than Iowa and expect to soon be back there again."

"The farmers are cutting oats now; no wheat here, the main crop is corn and it needs rain very much now. This month has been very warm, about 100 degrees in the shade yet one night it went down to 45."

"I am trying to get my son-in-law and his brothers to go to Alberta. Have 9 brothers and 3 sisters all married and living here now."

Yours very truly,
G. W. Gleason

1926 AUTOMOBILE ROAD MAP HERE

All Main, Secondary and Intermediate Trails Plainly Shown

The 1926 edition of the Automobile Road Map of Alberta, described by James W. Davidson, president of the Alberta Good Roads Ass'n, as the most authentic and accurate yet made, is just off the press. It is published by the Western Canada Road Route Service Ltd. of Calgary.

A copy of this map has been received by Stony Plain Sun and a perusal of it shows the great care and influence work that was necessary in its preparation.

It is announced that the map will be on sale in most of the stationery stores and garages in Alberta or may be secured direct from the publishers.

This big map sells for 75c. It is valuable to anyone starting out on a motor trip and will be a stimulus to tourist traffic in the province.

The Hon. Charles Stewart Renominated.

With delegates from every section of the riding in a bonanza, Hon. Charles Stewart, former premier of Alberta and Minister of the Interior in the MacKenzie King

Hon. Chas. Stewart.

cabinet, was Thursday night unanimously re-elected the Liberal nomination for the West Edmonton seat, which he represented in the last parliament.

No other name was even thought of by the crowded convention, and when H. Milton Martin, putting Mr. Stewart in nomination, referred to him as "a real Liberal, a real man, and a real fighting fighter, of whom the worst thing his opponents could say was that no man could be as honest as he seemed to be." The delegates broke into applause which lasted for several minutes.

Stony Plain and District.

The teaching staff of Camrose Normal, consisting of Mr. A. E. Torg (principal), Mr. Mrs. & Miss Jennie Manning, the Misses Burnett, Johnston, & Marshall, and Mr. Flint, were visitors on Saturday at the M. McKibby cottage, Edmonton Beach.

Mr. & Mrs. Armstrong, and Mrs. & Miss Perrin, of St. Albert, were visitors on Sunday with Mr. & Mrs. A. Alt.

The redoubtable "Bill" Bousser, well known in Stony and who showed the local boys "how" to play hockey, was a visitor in Edmonton Monday. Bill is travelling with the Sell-Photo circus, as understudy to Signor Wiffleter, the lion tamer.

There was a dance in Rosyth Hall Friday evening which was very well attended. The music was up to the usual excellent standard.

Fifty Farm Hands, just arrived, want work at once. Apply Paul Werner, Agent, Stony Plain.
